## **Minn Kota Transducer Bracket/Arm/Pole**

This is the ultimate transducer bracket. Made from the same mounting clamp and shaft as the Minn Kota electric engines.

For those of you that have tried other transducer brackets on the market will realise they are a waste of time and money. The Minn Kota bracket is the only bracket that will not move or bend.

Perfect for mounting on hire boats such as Chew, Rutland, Grafham and Pitsford etc. Can be mounted on the gunnels therefore making it ideal for vertical jiggling.

A montage of two transducer above and below can be created easily by offsetting the structure scan and mounting the skimmer transducer on the remaining holes. See enclosed photos of mounting arrangement.

Pre-drilled holes for Humminbird transducer for easy installation, Lowrance transducers can easily be installed by drilling an additional 2 small pilot holes in the mounting block.

Portable transducer pole Minn Kota base

- Length: 103cm (41")
- Shaft diameter: 29mm
- Clamping range: 20mm to 82mm
